HOWE'S SCALES

The Standard of the World.

Premiums taken this year over all other Scales.

State Fair—Maine—Three Highest Prizes.
California State Fair, Gold Medal—Highest Premium.

New-England Fair, Providence; R. I. Silver Medal.
Georgia State Fair, Highest Premium.
Indiana State Fair, Highest Premium.

For Simplicity of Principle, Quality of Workmanship and Material, without Comparison.

Great improvements have been made. CHECK RODS, which in the old style of Scales render them so liable to get out of order and weigh incorrectly, are done away with, and CHILLED IRON BALLS for the Platform to rest upon are substituted, which ensures them to weigh *correctly at all times* and takes off the abrasion from the knife-edge, causing them to retain their *sharpness and delicacy of action* for years. They also require a much *less* depth of Pit, and consequently can be set where *no* other scale can be, and at much less expense.

A full assortment of Railroad, Hay, Coal, Platform and Counter Scales, Weigh-Masters' Beams and Frames, and all varieties of Store and Railroad Trucks and Barrows adapted to all varieties of Business.

NEW YORK SAFETY STEAM POWER CO.

From Eight to Twenty Cents
per Horse-Power
per day.

[illegible]

FIVE HUNDRED ENGINES IN OPERATION.
FROM 2 TO 250 HORSE-POWER.

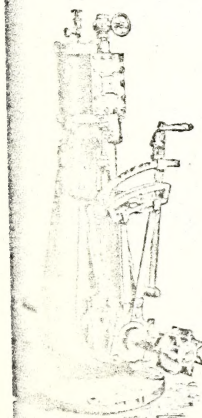

Being attached to one base, the *Combined Engine and Boiler* is easily transported, occupies little space, and may very readily be mounted upon wheels, rendering it peculiarly adapted for agricultural purposes.

The engine is not fastened to or upon the boiler, and is, therefore, not affected by the expansion, nor are the bearings overheated by conduction or the ascending heat from the boiler.

The fly-wheel, being at the base, secures steadiness under the high speed which is necessary for economy of fuel.

The boilers are of the upright tubular type, with internal fire box, are made of the best material and workmanship, and are designed to 150 pounds pressure per inch. The heating surface and area of grate are in excess of the quantity usually allowed for the same power. They are fitted with our patent baffles and circulating coils, to insure efficient burning, and also with our PATENT SAFETY VALVE, which will melt and prevent the boiler burning, if the water gets

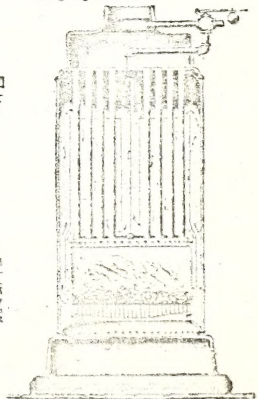

Our fusible plugs, though in the crown-sheet, never come in contact with water, so they can not become encrusted; and when the water fails so as to overheat the crown-sheet, the plug melts and causes steam to be discharged into the fire, putting it out, and giving an alarm.

HARDY MACHINE COMPANY.

PATENTED
 Feb. 5, 1861, Oct. 24, 1866
 Dec. 15, 1866, April 16, 1867,
 and June 21, 1870.

PATENTED
 FEB. 5, 1861, OCT. 24, 1866
 DEC. 15, 1866, APRIL 16, 1867,
 AND JUNE 21, 1870.

The above Cut represents the "HARDY" Improved
 Traverse Wheel Card Grinder, grinding the
 Doffer and Main Cylinder at the
 same time. (With adjustable
 Stand, complete).

This Company also manufacture the "HARDY" IMPROVED TOP FLAT GRINDER,
 to grind from 1 to 4, or 1 to 6 Tops at one time, perfectly. Machines to grind
 Workers, Strippers, Lickerins, and all small Cylinders, 1 to 4, or 1 to 6, at one
 time. Build a Planer Knife and Tool Grinder. Machines to buff or true off
 Calender Rolls, without removal from the frame, — a great discovery. Portable
 Drillers, Blacksmiths' and Breast Drillers, &c.
